

One Click to Update BIOS

Requirement:

- FAT/FAT32 USB drive
- CPU is installed
- RAM is installed
- PSU is installed (AC is plugged but keep the system off)
- Remove all other USB devices
- Download your MB's BIOS file correctly and unzip the file

Ex:

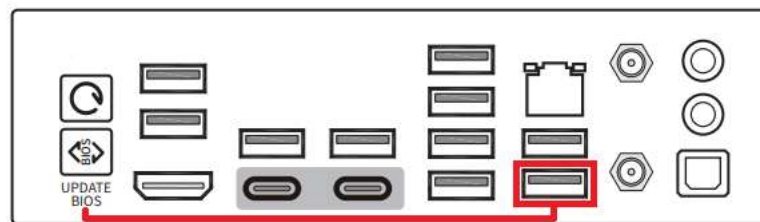

1. Clarify your AM5 CPU series and prepare BIOSUBU.BIN file.
If your AM5 CPU is 7xxx or 9xxx then please rename BIOSUBU.BIN_7000_9000 to **BIOSUBU.BIN**.
If your AM5 CPU is 8xxx then please rename BIOSUBU.BIN_8000 to **BIOSUBU.BIN**.
2. Confirm the BIOS BIN file is matched with your MB model.
SAPHIRE_XXXXX_XXXX_XXXX_AMXXXXXXXX.BIN
-----MB model
-----BIOS version
Rename SAPHIRE_XXXXX_XXXX_XXXX_AMXXXXXXXX.BIN to **PSPBIOS.IMG**
3. Copy **BIOSUBU.BIN** & **PSPBIOS.IMG** & **FORCE.TXT** to your FAT/FAT32 USB drive root folder.

4. Make sure all other USB devices are removed.

Plug your FAT/FAT32 USB drive into the correct USB port as below:

Rear I/O Interface

5. Click and hold the UPDATE BIOS button until the blue indicator light is on.
Release and wait for the update BIOS process.
The system will reboot after completing update BIOS process.
